FAQ – WonderWare Input

Abstract

On a WonderWare Input is it possible to change the delimiter passed on ProcessVue

Table of Contents

1On a Wonderware Input Is it possible to change the delimiter passed from ProcessVue? 3

1. On a Wonderware Input Is it possible to change the delimiter passed from ProcessVue?

Yes it is possible to change the delimiter, but you will have to do this in the attached ini file which is found in the following folder:

C:\Users\[User Account]\AppData\Local\MAC Solutions UK\ProcessVue\Data Collector

Open the appropriate Connector ini file depending on which Connector you have used to connect to Wonderware, in the example below this is Connector 3. In this file you will see something similar to the following:

```
[System]
Enabled=False

[Database]
Password=cFSKxAB2AGEAZABtAGkAbgAxADIAMwA0ACMA
ServerName=M4800
Username=sa
PollDelaySeconds=10
DatabaseName=WWALMDB
```

You will need to add the following:

[Server]
MessageOutputDelimiter=,

And change the comma to a more suitable character.
