PROCESSVUE

FAQ – SQL Express

Abstract

I'm using SQL Express and ProcessVue isn't accepting any new data and the memory allocation of the Archiver continues to grow

1. I'm using SQL Express and ProcessVue isn't accepting any new data and the memory allocation of the Archiver continues to grow

This will only happen when you are using SQL Express to host the ProcessVue Database. Check your Instance of SQL Server, if you are using SQL Express the problem will probably be related to the hard limit of SQL Express.

SQL Express is limited to 10GB's of disk space, once this limit is reached no new data can be added to the SQL Express database. ProcessVue will go into a buffering state as it can no longer pass data over to the database.

This issue can only be resolved by installing a full version of SQL Server.
