PROCESSVUE

FAQ – Website does not display

Abstract

The ProcessVue website theme is not displayed correctly

Table of Contents

1. The ProcessVue website theme is not displayed correctly..... 2

1. The ProcessVue website theme is not displayed correctly

This can be resolved by enabling Static Content from within the Internet Information Services.

Open Add/Remove Windows features from the control panel and nest into the following path: Internet Information Services>World Wide Web Services>Common HTTP Features>Static Content.

Ensure a tick is present against the Static Content option and click ok. Then restart the ProcessVue Website to ensure the new settings are applied.
