PROCESSVUE

# FAQ – Website does not display

## Abstract

**The ProcessVue website theme is not displayed correctly**

## Table of Contents

1. The installation of either the SOE or Analyser thin Client fails almost immediately, what could be causing it to fail? ..... 3

# 1. The ProcessVue website theme is not displayed correctly

This can be resolved by enabling Static Content from within the Internet Information Services.

Open Add/Remove Windows features from the control panel and nest into the following path: Internet Information Services>World Wide Web Services>Common HTTP Features>Static Content.

Ensure a tick is present against the Static Content option and click ok. Then restart the ProcessVue Website to ensure the new settings are applied.
