PROCESSVUE

Do I have to stop my ProcessVue Software to upgrade my licenses?

Abstract

Knowledgebase article on what to do with the ProcessVue Software when upgrading your licenses.

No, you do not have to stop the ProcessVue software to install your new licenses, you can copy them while your ProcessVue software is running. However, as ProcessVue checks the state of the licenses during start-up, you will need to restart your ProcessVue software before the new changes take effect.

For any further instruction on updating your licences, please contact the ProcessVue Support team.
